

Table A: All references after removing duplicates (N = 438)

- Articles with an asterisk (*) had one or more duplicates
- Articles where the included-column is marked (N=53) were included for full text read
- Articles where both columns (included & excluded) are marked (N=18) were excluded after full text read.
- Articles in **bold script** and where only the included-column is marked indicate inclusion in the final sample (N=35)
